

KTM 1090, 1190 and 1290

Specific Hints

You won't need the foam backing pads when using Traveller Pannierz with our frame set. Stash them away in case you want to use the bags on another bike. If you only got the RHS bag it won't have the pad.

Use a single soft strap at the rear of the frame front to rear as shown.

Pass the strap through the loops of the frame and return to the double D ring set.

Attach other straps to any of the other loops you think hold the bags best. I prefer to use the front loops on the bag to the pillion foot-peg bracket and at top rear loop to the rack,

Rock hard solid is not required. A **little** "jiggling" about is not a bad thing.
